

Oskrba z vodo Leibnitzerfeldu GmbH zagotavlja oskrbo z vodo za približno 80.000 ljudi. Da bi zadovoljili vse večje povpraševanje po pitni vodi, je širitev, vzdrževanje ter obnova velikega pomena, prinaša pa tudi visoke investicije. Imajo 22 zaposlenih, in sicer na področju upravljanja, inženiringa, zaračunavanja vode, načrtovanja, opravljajo pa tudi dela, kot so nameščanje obloge na cevi, namestitev cevi in elektroinstalacijska dela. Cilj delovanja Leibnitzerfeld GmbH je zagotoviti nacionalno oskrbo s pitno vodo v južnem in jugovzhodnem štajerskem prostoru. Naša letna oskrba s pitno vodo, je okoli 3 milijone kubičnih metrov, pri čemer je 28 občin in tri partnerske občine, ki so dobavljene z dnevnimi vrhovi do 15.000 m<sup>3</sup>. Opremo sestavlja 11 vrtin, 41 povišanih rezervoarjev, 60 ojačevalcev tlaka, 170 km plinovodov ter 139 km daljnovodov.

Oskrba z vodo Leibnitzerfeld GmbH je stoddostotno v javni lasti. Dobiček ustvarja na podlagi povračila stroškov. Vsak cent od prodaje vode je porabljen povsem za obratovanje, vzdrževanje, ohranjanje in prenovo javnega vodovoda.

V ta namen je oskrba z vodo Leibnitzerfeld GmbH večstebrna. V okviru izvajanja medsebojne pomoči v primeru hude suše ali drugih naravnih katastrof lahko priskočijo na pomoč tudi ostalim podjetjem za oskrbo s pitno vodo ali obratno.

1. Kaj je cilj podjetja Leibnitzerfeld GmbH?
2. Naštej opremo, ki jo uporablja podjetje?
3. Koliko kubičnih metrov vode porabijo letno ter koliko občin s to vodo oskrbujejo?
4. Kako podjetje ustvarja dobiček in kam ga vlaga?
